QMI Diesel Fuel Additive with Cetane Booster

1. Product and company identification

Product use: Petrochemical industry: Diesel fuel detergent.
Validation date: 10/15/2008

In case of emergency - Chemical
QMI: (800) 255-8138
CHEM-TEL: (800) 255-3924

2. Hazards identification

Notice to reader
Afton operates a world-wide system for hazard communication. Some hazards shown in Section 3 may apply to non-EU countries and may not result in classification and labeling in the EU. Please see Sections 2 and 15 for country specific classification information, and Section 11 for additional details.
The preparation is classified as dangerous according to Directive 1999/45/EC and its amendments.
Classified as hazardous according to the criteria of NOHSC and classified as dangerous goods according to the ADG Code.

Primary hazards and critical effects
WARNING! CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
Physical/chemical hazards
COMBUSTIBLE. - United States and Canada
FLAMMABLE. - European Union
VAPOR MAY CAUSE FLASH FIRE.

Environmental hazards
Toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

3. Composition and information on ingredients

Note: see section 8 for occupational exposure limits and section 11 for LC50/LD50 information.

Ingredient name | CAS no. | Conc. (% w/w) | EU Classification | WHMIS Regulated?
|----------------|---------|---------------|--------------------|-------------------|
4. First aid measures

**Inhalation**
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

**Ingestion**
If affected person is fully conscious, give one glass of water to drink. Never give anything by mouth to an unconscious person. Get medical attention if symptoms appear.

**Skin contact**
In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately.

**Eye contact**
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

5. Fire-fighting measures

**Extinguishing media**
In case of fire, use water spray (fog), foam, dry chemical, or CO₂.

**Fire-fighting procedures**
Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

**Fire/explosion hazards**
COMBUSTIBLE. - United States and Canada  
FLAMMABLE. - European Union  
VAPOR MAY CAUSE FLASH FIRE. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

**Hazardous decomposition products**
These products are carbon oxides (CO, CO₂).

**Flash point**
Closed cup: 45°C (113°F). (Pensky-Martens. Minimum)

6. Accidental release measures

**Personal precautions**
Immediately contact emergency personnel. Eliminate all ignition sources. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Follow all fire-fighting procedures (section 5). Do not touch or walk through spilled material.

**Environmental precautions and clean-up methods**
If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials) and use a non-sparking or explosion-proof means to transfer material to a sealable, appropriate container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal. Minimize contact of spilled material with soils to prevent runoff to surface waterways.
7. Handling and storage

**Handling**
- Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Avoid breathing vapor or mist. Keep away from heat, sparks and flame. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Wash thoroughly after handling.

**Storage**
- Keep container in a well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

8. Exposure controls and personal protection

**Engineering controls**
- Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

**Personal protective equipment**
- Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s).

**Respiratory system**
- Use chemical resistant, impervious gloves.

**Skin and body**
- Where contact is likely, wear chemical resistant gloves, a chemical resistant suit, and boots. Additional body garments should be used based upon the task being performed.

**Hands**
- Use chemical resistant, impervious gloves.

**Eyes**
- Safety goggles are considered minimum protection. Goggles with a face shield may be necessary depending on quantity of material and conditions of use.

**Occupational exposure limits**

9. Physical and chemical properties

**Physical state and appearance**
- Liquid.

**Color**
- Amber. (Dark.)

**Odor**
- Amine-like.

**Specific gravity**
- 0.915 at 15.6°C

**Solubility**
- Insoluble in cold water.

**Viscosity**
- 21.1 cSt at 40°C.
10. Stability and reactivity

Stability: The product is stable.

Materials to avoid: Strong oxidizing and reducing agents.

Conditions to avoid: High temperatures, sparks, and open flames.

11. Toxicological information

Routes of entry: Skin, Eyes, Ingestion, and Inhalation.

Target organs: Contains material which may cause damage to the following organs: blood, kidneys, lungs, liver, heart, spleen, gastrointestinal tract, upper respiratory tract, immune system, skin, eyes, central nervous system (CNS), nose/sinuses.

Acute effects:

Inhalation: Irritating to respiratory system.

Ingestion: Ingestion may cause gastrointestinal irritation and diarrhea.

Skin contact: Irritating to skin.

Does not meet EU R38 classification criteria.

Eye contact: Irritating to eyes.

Does not meet EU R41 or R36 classification criteria.

Adverse effects:

- Adverse symptoms may include: In the presence of slight maternal toxicity, fetotoxic effects have been observed in the offspring of rats exposed by inhalation to Solvent Naphtha (petroleum) light aromatic.
- Adverse symptoms may include: This product contains trimethylbenzene. Literature data indicate that long-term inhalation exposure causes blood effects in laboratory animals.
- Adverse symptoms may include: liver, kidneys, lungs, and heart effects by dermal route and immune system effects by ingestion route. Not a developmental toxicant when administered dermally. Weak carcinogenic liver response was observed in mice, but not rats.
- Adverse symptoms may include: This product contains trimethylbenzene. Literature data indicate that long-term inhalation exposure causes blood effects in laboratory animals.
- Adverse symptoms may include: liver, kidneys, lungs, and heart effects by dermal route and immune system effects by ingestion route. Not a developmental toxicant when administered dermally. Weak carcinogenic liver response was observed in mice, but not rats.
- Adverse symptoms may include: This product contains trimethylbenzene. Literature data indicate that long-term inhalation exposure causes blood effects in laboratory animals.
- Adverse symptoms may include: This product contains naphthalene. Literature data indicate that long-term inhalation exposure causes blood effects in laboratory animals.
- Adverse symptoms may include: This product contains naphthalene. Naphthalene exposure may cause severe dermatitis in sensitized persons. Ingestion of naphthalene has caused hemolysis in humans deficient in glucose-6-phosphate dehydrogenase. Adverse effects could include liver and kidney abnormalities and corneal ulcerations and cataracts. This product contains naphthalene. A National Toxicology Program (NTP) final report states that lifetime inhalation exposure to naphthalene resulted in increases in nose tumors in rats and liver tumors in female mice.
- Adverse symptoms may include: Central nervous system, liver, kidneys, and blood effects by inhalation and heart beat irregularity (arrhythmia) and heart beat - increase. High exposures to xylene in some animal studies, often at levels toxic to the mother, affected embryo/fetal development. The significance of this finding to humans is not known.

Carcinogenic effects:

Classified 2B (Possible for humans.) by IARC [Naphthalene]. Classified 2 (Reasonably anticipated to be human : carcinogens.) by NTP [Naphthalene].

Classified 3 (Limited evidence of a carcinogenic effect.) by European Union [Naphthalene].

Not determined.

Other information: Not available.

12. Ecological information

Environmental hazards: Toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment. Based on calculation.

Environmental fate: This product contains components which may be persistent in the environment.
13. Disposal considerations

Waste handling and disposal: Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Harmful, Dangerous for the environment.

Risk phrases:

R10- Flammable,
R40- Limited evidence of a carcinogenic effect.
R37- Irritating to respiratory system.
R66- Repeated exposure may cause skin dryness or cracking.
R67- Vapors may cause drowsiness and dizziness.
R51/53- Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
S16- Keep away from sources of ignition - No smoking.
S23- Do not breathe vapor.
S36/37- Wear suitable protective clothing and gloves.
S57- Use appropriate containment to avoid environmental contamination.

Contains: Naphthalene

US regulations

SARA 313 toxic chemical notification and release reporting (w/w%):
