

FUEL

3-STEP FUEL SYSTEM CLEANING KIT

QMI® Fuel System Cleaning Kit is a 3-Step professional kit that effectively cleans the entire fuel system. RENU 500™ cleans fuel injectors and intake valves. Throttle Body Cleaner effectively removes varnish and carbon. QMI® Induction Cleaner safely dissolves carbon deposits and cleans the intake system, improving airflow.

✓ FEATURES & BENEFITS:

FUEL SYSTEM CLEANER:

- ✓ Cleans Fuel Injectors
- ✓ Rapid One Tank Cleanup of Intake Valve Deposits
- ✓ Offers Corrosion Protection

THROTTLE BODY CLEANER:

- ✓ Helps Clean Varnish and Carbon from the Throttle Plate
- ✓ Safe for Oxygen Sensors and Catalytic Converters

INDUCTION CLEANER:

- ✓ 2-Stage Cleaning Safely Dissolves Carbon Deposits
- ✓ Cleans the Intake System
- ✓ Improves Airflow

SPECIFICATIONS:

Product No: EK10T
Includes: FS1813,
GL1806/B & GL1811
Case Quantity: 8 Kits

3-STEP FUEL SYSTEM CLEANING KIT

PROBLEM

The engines of today are manufactured with a sophisticated fuel injection system. They are more complex than ever before. A clean and efficient fuel delivery system has never been more necessary.

- ✓ Gum and varnish build up on the throttle plate and result in disruption to airflow and slower activation in movement of throttle plates.
- ✓ Deposits that form on the intake ports and on the valves disrupt airflow. These deposits may cause hesitation, reduced power and increased emissions.
- ✓ If deposits form around the valve seal, they may cause sticking or leakage, reducing combustion chamber pressure.
- ✓ Fuel Injectors are designed to spray fuel into the chamber to achieve optimum results. When injectors become clogged by carbon deposits, loss of power results.

SOLUTION

QMI® 3-Step Fuel & Induction Decarbonization Kit contains specially formulated detergents developed to effectively clean your fuel injection and intake system in an easy 3-Step process.

- ✓ RENU 500™ Fuel System Cleaner provides rapid one-tank cleanup of fuel injector deposits and provides corrosion protection.
- ✓ Throttle Body Cleaner helps restore performance by dissolving gum and varnish deposits from the throttle plate.
- ✓ QMI® Induction Cleaner cleans your vehicle's intake system, improving airflow.

Note: This product may be used in any gasoline engine. Most effective in PFI engines.

Directions:

RENU 500™ Fuel System Cleaner: Add one bottle to fuel tank. Treats up to 20 gallons. Not for use in Diesel.

Throttle Body Cleaner: Aerosol applied directly to the throttle plate. See directions on the bottle.

QMI® Induction Cleaner: Applied through a vacuum port using the TN15000 tool. See job aid for directions.
